日数 : 2日間

受講対象者

NetAppストレージシステムでOnCommand Unified Managerを導入、設定、管理等を行う、次の方

- NetApp ユーザ
- NetApp パートナー
- NetApp 社員

コース概要

Through brief lectures, exercises, and classroom discussion you discover how to deploy and maintain an integrated OnCommand Unified Manager and pair it with OnCommand Workflow Automation (WFA) data-management solution. You learn how the performance-management features of Unified Manager provide a unified approach to storage management that reduces complexity. You also learn to how to extend Unified Manager's data protection capabilities with WFA. This course can be delivered in a traditional classroom or a virtual classroom.

目的

This course focuses on enabling you to do the following:

- Install and maintain an OnCommand Unified Manager deployment
- Migrate an OnCommand Performance Manager 7.1 database to Unified Manager 7.2
- Use Unified Manager to monitor the health and performance of your storage infrastructure
- Categorize storage objects and implement annotation and

group features

- Configure thresholds, event retention settings, and alerts, so that storage issues can be anticipated and quickly identified
- Explore reporting tools and run pre-configured reports
- Export data to a comma-separated-values (CSV) file to track historical trends
- Pair Unified Manager with OnCommand Workflow Automation (WFA) to manage protection relationships and storage objects in the storage infrastructure

アウトライン

Module 0: Welcome

Module 1: Review of Unified Manager and NetApp Data Management Products

Module 2: Deploy Unified Manager

Module 3: Explore the Unified Manager UI

Module 4: Customize Unified Manager for Your Storage Environment

Module 5: Monitor Storage Objects

Module 6: Maintain Unified Manager

Module 7: Use OnCommand WFA and Unified Manager to Manage Data Protection Relationships
