Data Protection Administrators

コース概要

This course describes the compliance features and benefits of the ONTAP 9 Data Management Software. The course enables you to explain the architecture and functionality of the integrated data protection compliance features. Additionally, the course will cover administration, configuration, and management of the integrated data protection compliance features.

The ONTAP Compliance Solutions course was written for data protection administrators of any experience level.

目的

By the end of this course, you should be able to:

- Describe the integrated data protection features in ONTAP 9 Data Management Software.
- Explain the architecture and implementation of SnapLock software.
- List methods in which encryption-keys can be managed.
- Describe how NetApp Volume Encryption (NVE) provides a software-based method to encrypt and protect data on any disk type.
- Describe how NetApp Storage Encryption (NSE) provides full-disk encryption (FDE) using self-encrypting drives.

アウトライン

Module 1: ONTAP Compliance Solutions

Module 2: Snaplock Volumes

Module 3: ONTAP Encryption Key Management

Module 4: ONTAP Data Encryption
